**NEON PN-101  
 (PLASTIC LINER )  
 Technical File**

**DESCRIPTION:** AN-101 is a white plastic liner, type “water polymer” destined for paintings of interior surroundings. In optimal conditions, based also on its components, this primer dries 3-4 hours after the application, creating a flat, transparent and homogenous layer on the surface where it is applied.

**AREA OF USE:** AN-101 is a liner used to cover new interior surfaces (concrete, plaster, gypsum tiles etc.) before being painted. The layer created from the AN-101 stabilizes the under layer of paint and creates strong connections between the paint and the surface to be painted, avoiding this way, cracks and falling of paint.

**COLOR:** White.

**USAGE:** AN-101 liner is an emulsion of white color and it’s ready to be used. It can be applied with rollers or brushes. After the layer is dried, the paint can be applied.

**WARNING:** The application of the liner in wet surfaces and in conditions of high humidity, IS NOT ALLOWED. It is also not advisable to use it under 5°C. After painting, the tools must be immediately washed with water and soap.

**TECHNICAL DATA:**

- Color..... White
- Tiny size.....
- Viscosity (30% water) Deep cup 4.....
- Density.....
- Covering power for full painting..... 3-5m<sup>2</sup>/L
- Dry residue.....
- Drying time..... 3-4 hours

**RISKINESS:** “NEON sh.a” liners have components which are not classified as dangerous, based on the Directive 1999/45/EC.

**PACKAGING:** Packaging is made in plastic buckets 0.75L, 3L and 9L.

**PRESERVING CONDITIONS:** In a hermetically closed packaging, protected by frosting.
