**NEON NC-10**  
(SOLVENT BASED ON TOLUENE)  
Technical File

---

**DESCRIPTION:** NEON NC-10 is an aromatic solvent is used as diluent on alkyd resin-based paints, varnishes etc. This solvent is more powerful compared to other solvents. It is usually used for products with a synthetic base and the high rate of vaporization improves application properties and performance of the product.

**WARNING: a)** Contact with an expert before use, for the right amount of NEON NC -10 which will be used as a diluent. Excess amount can disrupt chemical bonds of the product, its glossy finish or any other adverse sign for the product.

**TECHNICAL DATA:**

- Color.....Transparent
- Density.....0.77g / ml
- Impenetrability in water.....excellent
- Application temperature .....+ 0°C to + 30°C

**RISKINESS:**

1. R10 flammable
2. R 20 harmful if inhaled
3. R 38 irritating to skin
4. S37 Use work gloves

**PRESERVING CONDITIONS:** Sealed on metal package!
